

Academics

Tracking of crucial academic activities will no longer be tedious

Executing the academic plan successfully is imperative to an educational institution. Leveraging IT can empower you to execute the same efficiently and effectively. Our Academics offering provides a platform to manage timetables, map lesson plans to the syllabus, manage student activity as well as discipline, and resource utilization.

The Academics offering comprises the following features:

- **Timetable management:** Configured based on your requirements, it effectively manages the time of your faculty and students. In addition, it allows easy updates to manage daily event-led changes, updates of lesson plans, related quizzes, and provides the dean an overall perspective of the academic progress
- **Student attendance:** Integrated with the student leave module, timetable and the biometric attendance system, this module offers a complete view of student attendance
- **Student leave:** Students can apply for leave; view status and leave history through Self Service. The leave workflow can be defined, wherein the approver can approve or reject the request. While applying for leave, the student gets a view of the sessions that he/she will be missing, on the academic timetable
- **Student feedback:** Provides an easy-to-use, rich text editor that is designed to configure and capture responses of students, faculty, employees and other stakeholders
- **Student discipline:** Helps manage, view, and enforce disciplinary action; collect penalty charges, view disciplinary reports and more
- **Academic letters:** Generates various types of student letters, administrative letters, ID cards, receipts and more, that a student would require through the entire student life cycle

Timetable View-Faculty

Student Leave

"Campus management at one touch point through TCS iON made our administration simpler, time saving and more importantly eco friendly"

– Poornima Reddy, Director, Acharya Business School

Faculty Self Service View

Benefits

- iON implements the Academics solution and delivers a configured, ready to use system so that you can transact, extract and update configurations, all in real time
- Enables timetable driven attendance capture that is easy to use for teachers, saving considerable faculty time
- Daily and weekly view of timetable for students and faculty is available through their individual login screens and can be accessed from a mobile too
- Analytics detailing faculty who are regular in marking attendance, faculty utilization matrix and feedback response analysis help in generating faculty governance reports and capturing students' preferences. This makes it possible to recognize and reward top performing faculty and take suitable action against underperforming faculty
- Communication on students' attendance, class cancellations and changes in timings of the timetable can be sent in a dynamic manner to the students/parents through email. This helps students plan their schedule better and keeps parents well informed about their child's discipline
- Over 90 academic related reports can be generated
